RE: Bustang Outrider Phase III Route Recommendations

Purpose
The purpose of this memo is to provide the Transportation Commission recommendations on Bustang Outrider Phase III Rural Regional Route additions proposed to launch in 2021.

Action
The Division of Transit & Rail requests input from the Transportation Commission on the proposed new Outrider routes to begin January 2021. Approval will be sought in January 2020.

Background
The Bustang Outrider rural regional bus service began operation January 2, 2018, with a Lamar- Pueblo route operated by Senior Resource Development Agency of Pueblo, Inc. Outrider uses a different funding source (FTA 5311(f), rather than state FASTER funds) and is contracted-out as a pass-through grant agreement rather than a direct operational agreement with specific requirements. FTA rules allow local cash match to be replaced by “in-kind” contributions from private intercity bus “unsubsidized miles operated” or Transportation Development Credits.

Outrider serves essential service transportation from rural to an urban community services center as well as a connection to the national intercity bus network. Outrider is considered as, and is marketed as an “offspring” brand to the parent Bustang system.

With the FTA 5311(f) projects fully funded, it is anticipated that the majority of Phase III Outrider additions will be funded by uncommitted FASTER Operating dollars.

The Current Routes are:
- **Lamar - Colorado Springs** in revenue service Monday through Friday except major holidays and operated by Senior Resource Development Agency of Pueblo, Inc. (SRDA)
- **Alamosa - Salida - Pueblo** is in revenue service daily and is also operated by SRDA.
- **Gunnison - Salida - Denver** is operating in revenue service daily and is operated by Alpine Express Shuttle.
- **Durango - Grand Junction** has transitioned to Outrider from Roadrunner operating in revenue service daily by Southern Colorado Community Action Agency (SoCoCAA, formerly SUCAP)
- **Denver - Salt Lake City** - currently operated by Greyhound, and to be replaced in January 2021 as Outrider

The Proposed Routes are:
- **Trinidad - Pueblo** proposed for 5 days/week service, except major holidays.
- **Sterling - Greeley** proposed for 5 days/week service, except major holidays.
- **Telluride - Grand Junction** proposed for 5 days/week service, except major holidays.
- **Craig - Denver via U.S. 40** for 7 days/week service, except major holidays.
Details
The routes were scored on the following categories:
- Implementation Feasibility
- Geographic Equity
- Social Equity
- Feedback from Stakeholders

The four (4) routes selected for 2021 launch based on the above criteria:
1. Trinidad - Pueblo
2. Sterling - Greeley
3. Telluride - Grand Junction
4. Craig - Denver via U.S. 40

In addition four (4) routes scored high enough on the criteria to merit mention as a possible Phase IV implementation:
1. Montrose - Gunnison
2. Craig - Frisco via U.S. 40/SH 9
3. Sterling - Denver
4. Durango - Pagosa Springs

Trinidad - Pueblo - This 180 mile round trip service will start as a 5 day per week essential service making stops in Aguilar, Colorado City and Walsenburg along I-25. It will meet the need in Pueblo for medical, shopping, and connecting service to Bustang & Outrider routes to/from Alamosa, Gunnison, Lamar, Colorado Springs/ Denver and the Bustang network. The annual operating and maintenance costs would be about $230,000. One Body on Chassis bus plus another will be procured for a spare procured for this service for a total capital cost of $360,000.

Sterling - Greeley - This will will be a 200 mile round trip that will start as a 5 day per week essential service making stops in Brush, Fort Morgan and Wiggins along I-76 then U.S. 34 to/from. This service will have an important connecting service to/from Windsor and Fort Collins on the new Poudre Express launching January of 2020. The annual operating and maintenance costs would be about $240,000. One Body on Chassis bus plus another will be procured for a spare procured for this service for a total of $360,000 of capital.
Telluride - Grand Junction - This 5 day per week 244 mile round trip along SH145/62/US 550/US 50 will be an important essential service for the Western Slope allowing a day trip to regional services in Grand Junction as opposed to the current Durango - Grand Junction route which doesn’t allow for a day trip. This will be an important service for veterans allowing for enough time at the Grand Junction VA center. This service will also make stops in Placerville, Ridgeway, Montrose, Olathe and Delta. The annual operating and maintenance costs would be Approximately $347,000. Two (2) Van Hool CX-35 motor coaches, with one serving as a spare for a capital cost of $860,000.

Craig - Denver via US 40 - This would replace the Denver - Salt Lake City Greyhound service co-funded by CDOT and UDOT and would continue to serve FTA subsidized service between Denver and Salt Lake City, UT is experiencing a significant decrease in passenger traffic due to its business decisions by Greyhound Lines outside of Colorado but directly affecting the service in Colorado. The dwindling fare revenue has affected their profitability resulting in Greyhound Lines requesting significantly more in FTA subsidy funds for a declining schedule product. In addition, the subsidy per passenger is climbing at an unacceptable rate to what we project in 2020 of $83 per passenger, double what was in 2015. Our goal is to sunset this service in December 2020, redeploying the $552,536 in FTA Funds in January 2021 as a new Outrider route originating in Craig in the early morning to Denver via US 40 returning in the late afternoon, opposite of the service plan. The annual operating and maintenance cost would be about $600,000. The capital fleet costs of two (2) Van Hool CX-35 motor coaches, one for a spare, of $860,000

The Division of Transit and Rail has received input from the Transit & Rail Advisory Committee in November and on December 6 from the Statewide Transportation Advisory Committee.

The Division of Transit and Rail, requests input from the Transportation Commission at this workshop in December, prior to requesting approval from the Transportation Commission in January 2020.

**Next Steps**

- Final review of comments from TRAC, STAC & TC.
- Present the final Outrider Phase III route recommendations to the TC in January 2020 for approval.
